

ALCHEWAT NOVIS

BIOLOGICAL WALL DRYING SYSTEM

Rising damp is not the most common type of moisture found in structures; this is condensation. However, a large proportion of old buildings are affected to some extent by rising damp.

- Problems with mold?
- Damp walls and flaking on the walls?
- Cold and damp rooms?

Thanks to its many years of experience in this field, **ALCHEWAT Novis** offers you the solution for eliminating problems related to rising damp in masonry.

The assembly of the device only takes a few hours, no complex construction work is necessary and it can be carried out at any time of the year.

The **ALCHEWAT** Novis system requires no electricity, no chemicals and does not generate harmful electromagnetic waves.

There are no interventions in the statics of the structures and accompanying construction measures are usually not required. Ideal for renovation and refurbishment work in any type of building.

STOPS RISING
MOISTURE

ENVIRONMENTALLY
FRIENDLY

ELIMINATES MOLD

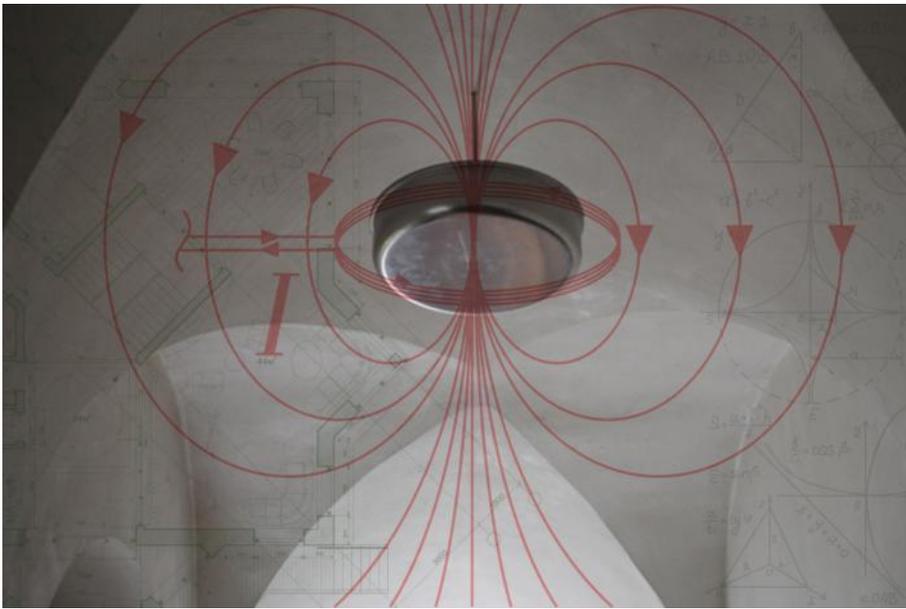

KEEP YOUR
WALLS AND ROOMS

ALCHEWAT NOVIS

BIOLOGICAL WALL DRYING SYSTEM

The **ALCHEWAT NOVIS** system stops the steadily increasing moisture penetration in the masonry and reverses the trend towards permanent dehumidification.

The effects are noticeable:

- the wall moisture decreases measurably
- the transport of salt, the efflorescence and its destructive effect cease
- the plaster and paint flaking as well as the destruction of the building fabric are stopped
- the musty smell disappears
- the previous insulation value of the building material is restored
- the value of your property will be restored

The dehumidification process can take between 6 months and approx. 2 years, depending on the type of building fabric. In our experience, a visible and measurable improvement will usually occur after two months.

Wall drying system based on a technology inspired by the "Research Report of the Federal Ministry for Economic Cooperation and Development - Report E 5001-15".

Rising damp can lead to various problems, such as mold formation, salt efflorescence or damage to the building structure. It is important to identify this problem early and take appropriate measures to prevent further damage.

Easy to assemble - Installation without work, noise or dust - Effectively removes moisture through capillary action - Suitable for basements and ground floors - 70% cheaper than conventional solutions to remove moisture.

TECHNICAL DATA

Model	ALCHEWAT Novis
Application	Houses, apartments, offices, shops, hotels, etc.
Range	Up to 30m toroidal
Dimensions	AN280: Ø 280 mm x 280 mm AN300: Ø 300 mm x 100 mm AN500: Ø 500 mm x 130 mm ANQ100: 380 x 615 x 50 mm
Materials and components	Aluminum alloy, copper, stainless steel, plastic
Weight	about 1 kg
Guarantee	10 years on material and workmanship
Right of return	2 years

OLD "TECHNOLOGIES" FOUND AGAIN?

In the sea of information in which we are immersed today, there is extraordinary news that unfortunately fades into the background. In 1911 my grandfather started collecting documents, patents, books and documentation on technologies for harmonizing the environment, humans and animals. My father started applying these theories and technologies in agriculture with positive results. In 1984 the third generation of our family began to follow this path and to test the "family technologies" and to develop them further. The various **ALCHEWAT** systems have been manufactured in Bolzano in South Tyrol since 2010. Our technology is based on the studies, theories and techniques of the great geniuses of history:

Ing. Bernard B. Kazhinsky (1890-1962)
MD. Alexander G. Gurwitsch (1874-1954)
Ing. Georges Lakhovsky (1869 – 1942)
Ing. Nikola Tesla (1856-1943)
Royal Raymond Rife Jr. (1888-1971)
MD. Dmitrij I. Mendeleev (1834-1907)
D. C. Vladimir I. Vernadskij (1863-1945)
MD. Vladimir M. Bechterev (1857-1927)
